

Windows 2000

Kreiranje ADSL konekcije

Kreiranje ADSL konekcije (Windows 2000)

Prije konfiguriranja veze za spajanje na Internet potrebno je instalirati RASPPoE, kojeg možete naći na našim stranicama: http://www.ht.ba/hr/content/download/2184/31430/file/RASPPPOE_098B.ZIP

Nakon downloada na računalo RASPPPoE je potrebno otpakirati koristeći neki od programa kao što su WinZip, WinRar, Total Commander i dr.

Konfiguriranje počinjemo desnim klikom na **My Network Places** ikonu na radnoj površini. Klikom na **Properties** otvara se prozor **Network Connections**. Desnim klikom na postojeću mrežnu konekciju na koju je povezan ADSL modem, te lijevim na **Properties** otvara se prozor kao na sljedećoj slici:

| General | | |
|---|---|------------|
| Connect using: | | |
| Intel(R) PRO/10 | 00 VE Network Connec | tion |
| | | Configure |
| Components checked | are used by this conne | ction: |
| Elient for Micro Elient for Micro Elie and Printe File and Printe Internet Proto | osoft Networks r Sharing for Microsoft N col (TCP/IP) | Vetworks |
| Install | Uninstall | Properties |
| Description | | |
| Transmission Control Protocol/Internet Protocol. The default wide area network protocol that provides communication across diverse interconnected networks. | | |
| Show icon in taskbar when connected | | |
| | Clo | ose Cancel |

Isključite sve protokole osim TCP/IP i kliknite na Install. U prozoru koji se otvori odaberite **Protocol** i kliknite na **Add**.

Otvorit će se prozor u kojem kliknite na **Have Disk**, zatim **Browse**, te odaberite mapu na disku gdje su raspakirane RASPPPoE datoteke i kliknite na **OK**. Odaberite **PPP over Ethernet Protocol** i kliknite **OK**. Kada se za vrijeme instalacije pojavi upit o nastavku instalacije kliknite **Yes**. Nakon uspješne instalacije PPPoE protokola prozor **Properties** izgleda kao na sljedećoj slici.

| General | |
|--|---------------------|
| Connect using: | |
| Intel(R) PRO/100 VE Network Connection | |
| | Configure |
| Components checked are used by this connection: | |
| Elient for Microsoft Networks File and Printer Sharing for Microsoft Networks FPP over Ethernet Protocol Thternet Protocol (TCP/IP) | |
| Install Uninstall Pro | operties |
| Description Allows making PPP connections through Ethernet ar according to RFC 2516. Required for connections w broadband service providers. | dapters ith many |
| ОК | Cancel |

Kliknite na **Properties** i u sljedećem prozoru napravite neophodnu promjenu vrijednosti parametra MTU (Maximum Transfer Unit) s početne vrijedenosti 1492 na vrijednost 1460. Kliknite na **OK**.

| PPP over Ethernet Protocol Properties |
|---|
| General Advanced |
| When using Internet Connection Sharing (ICS), the clients may experience delays and stalls when accessing the Internet. This option makes the protocol check and limit any TCP MSS option found in the network packets it passes to solve this problem. |
| Limit TCP Maximum Segment Size (MSS) Option |
| You can override the Maximum Transfer Unit the protocol uses, e.g. to reserve network packet space for certain VPN software or to work around a problem with your ISP. This setting requires toggling the network adapter off/on or a reboot to take effect. |
| 🔽 Override Maximum Transfer Unit |
| Maximum Transfer Unit (MTU): 1460 🚍 |
| If you need to run several simultaneous connections through this adapter, you can increase the number of lines offered for it. This setting requires a reboot for changes to take effect. Number of lines (WAN endpoints): |
| OK Cancel |

Sljedeći korak je kreirati vezu za pristup Internetu. Kliknite na **Start, Run** i upišite **raspppoe** kako bi pokrenuli **RASPPPoE Dial-Up Connection Setup**. Kliknite na **Query Available Services**, zatim na uslugu koja vam je na raspolaganju, dalje na **Create a Dial-Up Connection for the selected Services** i **Exit**. Na radnoj površini će se pojaviti nova ikona za pristup Internetu.
